PROFESSIONAL SUMMARY

Experienced Software Engineer with 7+ years of experience building backend and full-stack systems, SaaS platforms, and production AI applications. Strong in Python, TypeScript, JavaScript, Node.js, FastAPI, SQL, and MongoDB, with hands-on experience building LLM agents, RAG pipelines, high-throughput processing workflows, and multi-tenant fintech platforms. Led engineering teams and delivered production systems supporting enterprise clients and millions of records and transactions.

PROFESSIONAL EXPERIENCE

- **AI/ML Engineer (HYBRID)** @ [DME \(Data Machine Elite\)](#), Lisbon, Portugal. 2023 (Oct) – 2026 (Aug)
 - Led 7 engineers to design and launch a multi-tenant Merchant Cash Advance SaaS platform, overseeing architecture, code reviews, sprint planning, and production releases.
 - Architected **Vero**, a production AI agent for MCA CRM operations with **60+ tools** supporting conversational search and multi-step record management.
 - Built an AI document-processing pipeline with LlamaCloud, OCR, and LLM extraction, converting unstructured financial documents into structured data and reducing processing time **65%** and manual review **80%**.
 - Systematized client data migration using REST APIs, Puppeteer, and ETL workflows, moving **millions of records** across the CRM and reducing client onboarding time by **70%**.
 - Integrated Stripe, Plaid, Teller, Actum, Twilio, DocuSign, and OpenAI across MCA origination, ACH funding/paybacks, e-signature, and AI underwriting, automating **1,000+** applications/month and reducing manual underwriting effort **60%**.
 - Managed cloud infrastructure, CI/CD pipelines, and repository governance across DigitalOcean and Google Cloud Run for **4** production applications.
- **Generative AI Developer (ONSITE)** @ [Ca Foscari](#), Venice, Italy. 2022 (Sept) – 2023 (Sept)
 - Prototyped a conditional DDPM in PyTorch for 32x32 CIFAR-10 image generation, implementing a U-Net-style encoder-decoder with residual blocks, four-head attention, GroupNorm/SiLU layers, skip connections, and a cosine noise schedule.
 - Built a 20-epoch noise-prediction workflow with Gaussian noise injection, MSE loss, Adam/StepLR optimization, gradient clipping, per-epoch checkpointing, and post-training sample visualization; researched autoencoders, GANs, GNNs, OOD detection, and active learning.
- **ML Engineer / Python Developer (ONSITE)** @ [AgriDunya Technologies](#), Karachi, Pakistan. 2021 (Jan) – 2022 (August)
 - Optimized the MCPETL billing engine, boosting throughput **5x** and reducing per-record processing time **80%** (400K records in 4:35 min to 750K in 1:42 min), supporting enterprise clients including Uber Canada, Payoneer, SEEN, and CIBC.
 - Shipped 27 configurable billing components for the MCPETL platform, enabling usage-based invoicing and processing **millions of transactions** per month across multiple enterprise clients.
 - Engineered configurable iOS modules in Swift for financial institutions including The Bank of Missouri and Direct Express, delivering reusable functionality on a platform serving **500+** institutions and **millions of end users**.
 - Developed a cross-platform chatbot application using Flutter and integrated it into iOS and Android banking applications, enabling in-app customer support for **20+** enterprise clients.
 - Built Python backend services and REST APIs with Flask and FastAPI for web applications, data-processing workflows, and agricultural AI use cases.
 - Developed CNN image classifiers in Python and PyTorch for crop-disease inference, covering data loaders, cross-entropy loss, Adam optimization, confusion-matrix analysis, and model checkpointing.
- **Software Engineer** @ [Sukkur IBA](#), Sindh, Pakistan. 2016 (Jan) – 2018 (Sept)
 - Engineered microservices-based ETL systems in **Django and Python**, replacing batch-processing workflows with real-time business intelligence and enabling same-day reporting for leadership.
 - Optimized frontend rendering and database query performance for large-scale datasets, improving dashboard responsiveness by **30%** and reducing reporting latency from hours to minutes.
 - Built production RAG pipelines with vector databases, semantic search, chunking, re-ranking, and prompt optimization, grounding responses in retrieved sources and reducing unsupported LLM outputs.
 - Delivered enterprise analytics platforms integrating Salesforce APIs, enabling stakeholders to explore **1M+** records through interactive dashboards.

PART TIME PROJECTS WITH COMPANIES

- **LLM Benchmark Reviewer (REMOTE)** @ [Pasiflora AI](#), Eagan, MN, USA. 2026 (Jul 22) – 2026 (Aug 10)
 - Review graduate-to-PhD STEM reasoning benchmarks for self-containment, originality, technical correctness, answer uniqueness, and reproducible step-by-step reference solutions.
- **PyTorch Expert - AI Evaluation (REMOTE)** @ [AfterQuery](#), San Francisco, CA, USA. 2026 (Jul) – 2026 (Aug 10)
 - Design industry-level PyTorch benchmarks for AI coding agents, targeting subtle failures in tensor layouts, autograd, numerical precision, compilation, and kernel-framework integration.
- **Machine Learning Engineer - AI Benchmarking (REMOTE)** @ [Mercor](#), San Francisco, CA, USA. 2026 (Jun 24) – 2026 (Jul 15)
 - Created and evaluated machine-learning benchmark tasks, validating AI-generated specifications against task objectives and dataset requirements.

- Python Coding Expert - AI Training (REMOTE, CONTRACT)** @ [Micro.1](#), San Francisco, CA, USA. 2026 (May 30) – 2026 (Jul 1)
 - Evaluated and corrected AI-generated code, primarily in Python, against task specifications and review rubrics, resolving functional, logical, and maintainability defects.
- LLM and Agentic AI Engineer (REMOTE)** @ [Turing.com](#), San Francisco, CA, USA. 2024 (Oct) – 2025 (Dec)
 - Project: LLM Code Generation Evaluation / AI Response Quality Evaluation for Microsoft.**
Stack: LLMs, Prompt Evaluation, Python, JavaScript, Instruction-Following & Correctness Assessment, Human Annotation/Evaluation Rubrics.
 - Project: Novel Code Debugging & Golden Solution Validation for Microsoft** – evaluating Python coding challenges, identifying bugs, and producing verified “golden” reference solutions.
Stack: Python, Pytest, Docker, Podman, LLM Prompt Evaluation, Code Debugging, Test Validation, Algorithmic Problem Solving.
 - Project: ACPS – Agent Completion / Agentic AI Evaluation:** Evaluated AI agents on task completion, response quality, instruction following, reasoning, and correctness across agent-based workflows.
Stack: LLMs, AI Agents, Prompt Evaluation, Agentic Workflows, Human Evaluation, Quality Assessment.
 - Project: LLM Safety & Responsible AI Evaluation:** Evaluated safety-focused prompts and model responses against a structured safety taxonomy covering harmful, sensitive, regulated, biased, misleading, and jailbreak-related content.
Stack: LLMs, Prompt Safety Evaluation, Responsible AI, Red Teaming, Safety Taxonomy, Content Classification, Human Annotation.
 - Project: SWE-bench Repository Issue Resolution** – worked on real-world software repositories by analyzing failing/broken pull requests and reported issues, identifying root causes, and implementing fixes to restore expected behavior.
Stack: Git, GitHub, Python, Repository Debugging, Pull Request Analysis, Issue Resolution, Testing, Software Maintenance.

EDUCATION

- MS in Software Engineering** @ [Tianjin University](#), Tianjin, China. 2018 (Sept) – 2021 (Oct)
- BS in Computer Science** @ [Sukkur IBA University](#), Sukkur, Pakistan. 2012 (Jan) – 2015 (Dec)

PROJECTS

- Merchant Cash Advance CRM** Web
 Multi-tenant fintech SaaS with AI-assisted underwriting, ACH processing, AI document-processing pipelines, CRM workflow automation, and high-throughput ETL workflows. *Next.js, Node.js, MongoDB, Redis, Stripe, Plaid, Twilio, ACH, OpenAI – aimyadvance.com*
- AURA** Web
 AI-assisted underwriting platform for workflow automation and structured data extraction. *Python, FastAPI, React.js, LLM APIs – aimyunderwriting.com*
- K9 CRM** Web
 Bookkeeping-focused CRM for client management, transaction tracking, reporting, and workflow management at scale. *Next.js, NestJS, AWS S3, PostgreSQL – crm.k9bookkeeping.com*
- SMSBurst** Web
 Sales automation platform with bulk email/SMS, an AI chat assistant trained on client history, and n8n workflows for meeting scheduling and task assignment. *Node.js, EJS, n8n, Telnyx, Twilio, Hugging Face*
- HRMS** Web
 SaaS CRM with Meta API lead generation, WhatsApp integration, multilingual voice AI chatbot, task management, and salary processing. *React.js, Node.js, Meta APIs, MCP – hisabkarlay.com*

TECHNICAL SKILLS

- Languages:** Python, TypeScript, JavaScript, SQL, Swift, Dart, Java, Kotlin.
- Backend:** Node.js, NestJS, Express.js, FastAPI, Django, REST APIs, ETL, Puppeteer, RabbitMQ, Kafka.
- Agentic AI:** CrewAI, LangChain Agents, LangGraph, AutoGen, tool-based reasoning, ReAct pattern, memory management, task decomposition, autonomous workflows, agent planning & communication strategies.
- LLMs & NLP:** Transformers (Hugging Face), LlamaIndex, OpenAI API, Supervised Fine-Tuning (SFT), Reinforcement Learning with Human Feedback (RLHF), Prompt Engineering, FAISS, RAG.
- AI/ML & MLOps:** TensorFlow, PyTorch, Scikit-learn, Keras, MLflow, Hugging Face, Amazon SageMaker, Azure ML, ONNX, GANs, Transfer Learning, Pandas, NumPy, Dask, SMOTE, Feature Engineering, model deployment, end-to-end pipelines, versioning.
- Frontend:** React.js, TypeScript, Tailwind CSS, HTML5, CSS3, API integration, Streamlit, Gradio.
- Databases & Storage:** Amazon DynamoDB, Neo4j, MongoDB, PostgreSQL, MySQL, Firebase, Redis, SQLite, BigQuery ML.
- Cloud/DevOps:** AWS, Azure, Google Cloud, Jenkins, GitHub Actions, Docker, CI/CD pipelines, Terraform, NGINX, Kubernetes, GitLab, GitOps, MLflow, GitHub Copilot.
- Tools:** Pytest, Jupyter, VS Code, Postman, Git, Conda, Pyenv, Hugging Face Hub, Weights & Biases.

CREDENTIALS

- Coding: Python, C++ & SQL: Global Rank #1; Software Engineer Certificate** – [hackerrank.com/profile/Nooruddin](#)
- Certifications:** [AWS Cloud Support Associate](#); [AWS Machine Learning Specialty](#); [MLOps](#); [Docker Certified Associate](#); [CI/CD](#); [LLMOps](#)
- Achievements:** Production AI delivery for enterprise systems and high-throughput workflows; promoted to Secondary PoD Lead for LLM evaluation quality; Chinese Government Scholarship (CSC), 2018; Merit-Based ICT R&D Fund BS Scholarship, Pakistan, 2012
